Summary

Technical Professional with 1.5+ years of corporate IT experience across Accenture and Amazon, spanning Technical Support, Cloud Operations, and Software Engineering. Proficient in Java, Python, SQL, REST APIs, system troubleshooting, and L2/L3 production incident resolution via ServiceNow. Strong Computer Science background (GATE CS Qualified, MCA in Data Analytics) with hands-on full-stack development experience. Microsoft Certified: Azure Fundamentals (AZ-900). Immediate Joiner (0-Day Notice Period) open to Software Engineering, Technical Support, QA/Testing, and Cloud Operations roles.

Experience

Accenture	Gurgaon, India
Packaged App Development Associate (Cloud operations \ NOC)	Mar 2024 – May 2025
- Administered and monitored high-availability Microsoft Azure Virtual Machines, ensuring 99.9%+ system uptime across production cloud infrastructure. - Managed and executed change requests and infrastructure deployments. - Diagnosed and resolved critical L2/L3 incidents, service requests, and system alerts via ServiceNow strictly within target SLA timelines. - Validated REST API endpoints using Postman, executed database queries via SQL, and performed application-level testing to verify full-stack feature deployments across cloud environments. - Configured, scheduled, and monitored complex enterprise batch job workflows using Control-M.	
Amazon Development Center	Kolkata, India
Associate	Jun 2023 – Aug 2023
- Incident & Queue Management: Monitored high-volume operational queues, logged technical tickets, and resolved application issues within strict SLA parameters. - Tracked recurring system errors, performed basic root-cause analysis, and escalated complex technical issues to L2/L3 engineering teams.	

Projects

Customer Churn Prediction using Machine Learning
- Technologies used: Python, Pandas, NumPy, Matplotlib, Scikit-learn - Analyzed 7,043 telecom customer records to identify key churn drivers through EDA and data visualization. - Built and compared Logistic Regression, Decision Tree & Random Forest models with preprocessing and hyperparameter tuning.
AbhiSocial – Full Stack Social Platform
Technologies Used: React, MongoDB, Node.js, Express, REST APIs - Built and deployed a full-stack social media application using React, Node.js, Express, and MongoDB. - Developed secure RESTful API endpoints for user authentication, post operations, and dynamic database queries.

Education

Jain University	Masters (Data Analytics) • 8.35 / 10
CSE	Jun 2024 – Sep 2026

Skills

☁ Cloud & Operations	🗣 Languages	🛠 AI & Developer tools	🌐 Web & Frameworks	🗄 Databases & Tools
Microsoft Azure, ServiceNow, Control-M, Linux/NOC Fundamentals	Java, Python, SQL, C, Javascript	GitHub Copilot, ChatGPT/ Claude (Prompt Engineering for Code Generation, Refactoring, & Test Case Generation), Postman	React, Node.js, Express, REST APIs, HTML/CSS	MongoDB, MySQL, GitHub, JIRA, ServiceNow, SDLC, Software testing and QA fundamentals
